

About Us (can be modified if it is not good enough):

Didirikan pada tahun 1968, Light Optical mengkhususkan diri dalam memberikan layanan terbaik untuk kebutuhan optik untuk pelanggan kami. Dan pada tahun 1991 menempati gedung baru yang lebih representative dan merupakan satu-satunya optic terbesar dan termegah di Bandung. Light Optical menyediakan koleksi-koleksi kacamata terlengkap dari merk eksklusif dunia dengan garansi 100% Original. Koleksi-koleksi yang disediakan selalu mengikuti tren yang terbaru dan terkini untuk segala usia, dari pria, wanita, remaja, anak-anak sampai dengan orang tua. Selain frame, sunglasses, lensa dan aksesoris kacamata, Light Optical juga menyediakan lensa kontak, cairan beserta aksesorisnya.

Founded in 1968, Light Optical specialized in providing the best service in optical needs to our customers. And since 1991 moved into a new building that is more representative and is the largest and the grandest in Bandung. Light Optical offers the most complete collection of eyewear brands worldwide exclusive with warranty 100% Original. Collections provided always follow the newest and latest trends for all ages, from men, women, teens, children up to the parents. In addition to frames, sunglasses, lenses and eyewear accessories, Light Optical also offers contact lenses, solutions and its accessories.

Contact Lenses brands (Show Logo and name):

Acuvue, Cooper Vision, X2 by Exoticon

Website Prompt:

Create a fully responsive, modern, and professional website for an optical (eyewear) brand. The website must include the following sections/pages clearly organized:

About Us – A compelling story about the optical store, its expertise in vision care, commitment to quality eyewear, and customer-first approach.

Contact Us – A functional contact section with a form (name, email, message), visible email address, phone number, and a placeholder for a Google Map showing the store's location.

Products – A sub-navigation or categorized layout showcasing:

- Brands (e.g., Ray-Ban, Oakley, Gucci, etc. – use placeholder images and names)
- Lenses (single vision, progressive, blue light blocking, transitions)
- Contact Lenses (daily, monthly, toric, colored – with placeholder descriptions)

Address – Display the physical store address prominently (can be included in the Contact Us section and/or footer).

Design requirements: Clean, minimalist, and trustworthy aesthetic (whites, soft blues, or warm grays recommended).

Fully mobile-friendly (responsive) layout.

Use high-quality placeholder images related to eyewear.

Include a navigation bar (Home, About Us, Products, Contact Us) and a footer with copyright and address.

Products do not need a shopping cart at this stage – just showcase categories and examples with images, names, and short descriptions. The website only shows the company profile not for ordering items.

Technical notes:

Write the code in HTML, CSS, and optional JavaScript for interactivity (e.g., mobile menu toggle).

All content should be static but structured professionally so I can easily replace text/images later.

Ensure the address is visible on the Contact Us page and footer.
